

Position/Title: Enhancement Biologist

Agency/Location: Quinault Department of Fisheries, Taholah, WA

Responsibilities/Qualifications:

The Quinault Indian Nation is seeking a qualified enhancement biologist to provide technical expertise and leadership to effectively manage salmon and steelhead enhancement activities and facilities of the Quinault Department of Fisheries. Responsibilities include the following: evaluation and monitoring of enhancement programs, directing brood stock collection, egg incubation and all aspects of rearing juvenile salmonids at QIN hatcheries, involvement in regional hatchery planning forums, development of new enhancement programs and application of innovative aquaculture technologies. This position requires leadership ability, organizational and communication skills. The position will be stationed at the Quinault field office, located at Lake Quinault.

Salary: DOQ. Quinault offers a very competitive benefit package.

Closing Date: until filled
